

## Solar pump group: SP106 (combined with Sp24)

### Components

1. "WILO" Circulation pump: little noise, high efficiency
2. Flowmeter: adjusts the circulation medium flux
3. Intelligent controller: controls the whole system automatically and intelligently, easy for operation
4. Expansion vessel: adjusts and balances the working pressure of solar thermal system
5. Security valve: steadies working pressure at 0.6Mpa, ensures the system's safety
6. Manometer: displays the working pressure of the system
7. The length of sensors can be customized as required
8. Package: paper box, carton
